

Anti Zebrafish Ccd1 Polyclonal Antibody

The novel zebrafish protein Ccd1 (Coiled-coil-DIX1) possesses a C-terminal DIX (Dishevelled-Axin) domain as well as an N-terminal coiled-coil domain. The DIX domain proteins Ccd1, Axin, and dishevelled (Dvl / Dsh) are important in Wnt signaling. Ccd1 forms a heteromeric complex with Axin and Dvl/Dsh and regulates neural patterning through Wnt pathway activation. This antibody presented here reacts with the coiled-coil domain of the Ccd1 isoforms Ccd1A, Ccd1B, Ccd1C.

(Brain Res Mol Brain Res., 2005 Apr 27; 135(1-2):169-80).

Package Size	25 μ g (100 μ L/vial)
Format	Rabbit polyclonal antibody (0.25mg/mL)
Buffer	PBS [containing 2% Block Ace as a stabilizer, 0.1% Proclin as a bacteriostat]
Storage	Store below -20°C Once thawed, store at 4°C . Repeated freeze-thaw cycles should be avoided.
Purification method	This antibody was established from the serum of a rabbit immunized with a peptide fragment of Ccd1. Purified by peptide affinity chromatography.
Working dilution	For Western blotting : 1.0 μ g/ml For Immunocytochemistry : 1.0~2.0 μ g/ml

A

B

Immunocytochemistry

Sample:

- A) Zebrafish Ccd1-transfected HeLa cells
- B) Mouse Ccd1B-transfected HeLa cells
